NEEL NAVADIYA

Full-Stack Developer | React.js | Next.js | Node.js | NestJS | PostgreSQL

SUMMARY

Full-Stack Developer with professional experience building responsive, scalable web applications across frontend and backend systems. Experienced in React.js, Next.js, Node.js, Express.js, NestJS, REST APIs, Redux Toolkit, RTK Query, MongoDB, PostgreSQL, Prisma, and modern UI frameworks. Strong experience in frontend architecture, API integration, authentication and authorization, role-based access control, database-driven applications, dashboards, and AI-powered features. Comfortable translating product requirements and designs into reliable, user-focused software and working across the full development lifecycle.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Redux Toolkit, RTK Query, MUI, Tailwind CSS, Responsive UI, Component Architecture

Backend: Node.js, Express.js, NestJS, REST APIs, Authentication, Authorization, Role-Based Access Control (RBAC)

Databases & ORM: MongoDB, PostgreSQL, Prisma

Cloud & Tools: AWS, Git, GitHub, API Integration, AI API Integration

Engineering: Full-Stack Development, API Design, State Management, Database Design, Authentication Flows, CRUD Systems, Dashboard Development

PROFESSIONAL EXPERIENCE

Full-Stack Developer — WebOsmotic | 2024 – Present

Includes 6-month internship

- Develop and maintain full-stack web applications using modern JavaScript/TypeScript technologies across frontend and backend layers.
- Build responsive and reusable frontend interfaces using React.js, state-management libraries, and component-based architecture.
- Develop and integrate REST APIs for data-driven application workflows and frontend-backend communication.
- Implement authentication, authorization, and role-based access control to manage secure application access.
- Work with database-driven features involving structured data, CRUD operations, and application workflows.
- Collaborate with backend developers, designers, and other team members to translate product requirements into production-ready features.
- Debug application issues across frontend, API, state-management, and deployment layers.
- Contribute to maintainable codebases by following reusable component patterns and consistent development practices.

PROJECTS

Custama — AI-Powered Custom Chatbot Builder

Tech Stack: React.js | Node.js | AWS | AI APIs

- Developed the React.js frontend for an AI-powered chatbot builder with configurable knowledge bases and real-time interactive previews.
- Integrated AI APIs to support intelligent responses and automated FAQ suggestion workflows with user validation.
- Designed and implemented the Node.js database schema and Knowledge Base module for structured FAQ management and version tracking.
- Built frontend workflows for configuring chatbot knowledge and interacting with generated AI responses.
- Worked across frontend and backend layers to connect AI-powered functionality with application data and user workflows.

Verifix — Loan Verification System

Tech Stack: React.js | Redux Toolkit | RTK Query | MUI

- Built the complete frontend application for a loan verification platform, owning UI architecture and feature implementation.
- Designed reusable UI components using MUI to maintain a consistent and scalable interface.
- Implemented Redux Toolkit and RTK Query for predictable state management, API integration, caching, and efficient data fetching.
- Implemented authentication and authorization flows to control access across different user roles.
- Developed structured frontend workflows for loan-related data and verification processes.
- Integrated backend APIs with application state and user-facing workflows.

CommUnity — Unified Digital Community Platform

Tech Stack: MongoDB | React.js | Node.js | REST APIs

- Architected and developed the complete backend for a community management platform supporting both free and paid membership models.
- Designed and implemented role-based access control (RBAC) for Super Admins, Admins, Community Owners, and Users.
- Developed REST APIs for community discovery, joining workflows, category filtering, membership management, and subscription management.
- Built the backend architecture for classroom and course management, including administrative approval workflows for monetized content.
- Implemented engagement functionality including chat, posts, comments, likes, moderation, and reporting.
- Developed an administrative dashboard supporting analytics, user management, community management, and content moderation.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Engineering | 2021 – 2025

ADDITIONAL TECHNICAL EXPOSURE

Backend & Data: NestJS, Prisma, PostgreSQL **Frontend:** Next.js, TypeScript, Tailwind CSS **Architecture:** REST APIs, Authentication, Authorization, RBAC, State Management, Database Design
